

TOTAL GABON

Monsieur Christophe PESCHAUD
B.P. 331
Port-Gentil
GABON

Objet : Attestation

We, Total Gabon, certify having used Peschaud (BP 331 Port-Gentil Gabon) services with modular type barge for the following jobs.

1. 1994

Drilling three exploitation wells at Ozouri (Gabon) in shallow waters using a Schlumberger Drilling Rig (SK 15) mounted on a Peschaud modular barge equipped with anchoring poles and winches. Peschaud satisfactory provided a turnkey logistic work, including mobilisation, moves between locations and demobilisation of drilling modular support accommodation barge, transport and storage barges, crane work on site and regular delivery of consumables during the drilling phase.

2. 2003

Killing three wells at Ozouri (Gabon) in shallow waters using a Pescahud Manitowoc 130 Tonnes crane mounted on a Peschaud modular barge equipped with anchoring poles and winches. Peschaud satisfactory provided a full turnkey job (including work on wells), including mobilisation, moves between wells, demobilisation of work-over modular barge, accommodation camp and services onshore, crew boats and regular delivery of consumables during work phase.

3. 2005

Extract, transport for maintenance and put back in place of two crude oil loading arms (unit weights 32 Tonnes) at Cap Lopez Terminal using Peschaud Manitowoc 130 Tonnes crane mounted on a flexifloat barges equipped with anchoring winches. Peschaud satisfactory provided a turnkey logistic work, including mobilisations, demobilisations, extracting the two loading arms from their locations transporting them to Port-Gentil and back to site and put them back at their original position. This operation involved a modular flexifloat barge and tug, a crew/safety boat and a Minitowoc 130 Tonnes crawler crane.

These three contracts were performed in a professional manner in no incident or accident was reported.

Directeur des Opérations,

Marc FEUILLADE
